### CURRENCY

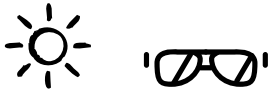

- The official currency is the Dominican Peso. 1€ is approximately equal to 55 Pesos. although the Euro is easily exchanged in all hotels, banks and currency exchange houses.

### ELECTRICITY

- All hotels have 220-volt electrical current, even though the national electrical network is 110 V / 60 Hz. It is recommended to bring flat pin plug adapters.

### CLIMATE

- The Dominican Republic has a warm tropical climate. The average temperature throughout the year is about 28°C. It is sunny almost every day of the year and you can enjoy the beach all year round. Hurricane season in this part of the Caribbean takes place between 1st June and 30th September. These phenomena are detected at the time of formation, evaluated in intensity and probable trajectory and speed. Therefore, it is impossible to determine several days in advance which zones will be directly affected by these types of meteorological phenomena and their degree of incidence, which leaves little room for time to assist affected customers.

We recommend to check the section “Recomendaciones de viaje” of the Spanish Ministry of Foreign Affairs ([www.mae.es](http://www.mae.es)).

## TRAVEL INFORMATION
